

SYSTEM DIAGNOSTICS & TESTING

With almost every automotive system being electronically controlled or monitored, it is no longer an option to buy a system tester - you need it to be in business

Typical kits include:

- Tester with software loaded to address most vehicle electronic systems
- OBD II cable and an assortment of vehicle specific cables
- Carrying case

Software updates available to keep your unit current

3874 GENISYS EVO

For specific features and capabilities see the OTC website:
<http://www.otctools.com/products/genisys-evo-absair-bag-cables>

MAXIDAS DS708

For specific features and capabilities see the Autel website:
<http://www.autel.us/Products/ds708.htm>

3895 GENISYS TOUCH

Same diagnostic features as the 3874, but adds a touch screen, J2534 communication device, wireless VCI, and 10 OEM style cables

For specific features and capabilities see the OTC website:
<http://www.otctools.com/products/genisys-touch>

MAXISYS MS908

Same diagnostic features as the DS708, but adds a larger touch screen (9.7"), and wireless VCI
